GENERAL SPECIFICATIONS

- Floor Standing
- Capacity : 23 liters – 6 gallons
- Adjustable Thermostat (0-90) °C
- Safety Thermostat
- 800Watt / 220-110V / 50-60Hz
- Heating System with Motor Cooling Water (Heat Ex—Changer)
- T&P Temperature and Pressure Safety Relief Valve
- Polyurethane Insulation (CFC Free)
- Stainless Steel Inner Tank
- Stainless Steel Prismatic Jacket
- Drain Valve
- Smart Appearance
- 2 Year Product Guarantee
- 10 Year Spare Parts Supply Guarantee

PRODUCT DESCRIPTION

Diko DPR-MP Serie marine and prismatic type electric water heaters are produced to provide desired hot water within the shortest and via the most reliable way. DPR Serie floor standing electric water heaters are with a standart capacity of 23 litre- 6 gallon and standart power of 2KW. Double protection against excessive heat is ensured with the help of the safety thermostat with double contacts. Temperature and Pressure Safety Relief Valve discharges excessive water / steam pressure and temperature in order to protect the system. Drain valve is also another mechanical accessory which is being given with the product. Providing hot water for consumption is possible via circulating the wasted engine water through the heat ex-changer circuit, which is standart for the yacht boilers. Thus user will just feel the comfort and happiness of hot water without thinking extra costs and without using the jenerator.
